

Bluetracker Security

Web based project management and collaboration app for the enterprise. Available 24/7 from anywhere. Share files, add feedback and centralize storage.

1. Bluetracker is hosted with one of top five business hosting providers worldwide.**

We are on one of the fastest and most reliable IP networks in the world with a 10GB/OC-192 network architecture.

2. Secure Socket Layer (SSL) support for both industry-standard 128-bit encryption and high grade 256-bit encryption.

3. All passwords are encrypted directly in the database.

4. IP Firewall permit/deny configuration on all accounts.

5. Customized Session time-out variable.

6. Full control over disable and delete projects, documents and users.

7. All documents are stored in secure data center, that is regularly backed up and has best practices Disaster Recovery policies.

8. Physical security to the data center includes professional security staff utilizing video surveillance, state of the art intrusion detection systems, and other electronic means.

9. All file access requires an encrypted key to upload and download.

10. All document links have a time-out variable, to prevent access from "copy and paste" URLs.

11. In transit interception is prevented via SSL encrypted endpoints. The encrypted endpoints are accessible from both the Internet and from within Bluetracker's data center, ensuring that data is transferred securely.
